

DEFOAMER

Defoamer

Description	DEFOAMER, a blend of high molecular weight alcohol and modified fatty acid derivatives, is oil-soluble and slightly water dispersible.
Applications/functions	DEFOAMER can be used to defoam water-based drilling fluids, crude oils, and aqueous solutions
Advantages	<ul style="list-style-type: none">• Provides immediate effectiveness in water-based drilling fluids and other aqueous solutions• Effective in small concentrations.
Typical properties	<ul style="list-style-type: none">• Appearance Yellow liquid• Flash point, PMCC, F(C) 134 (57)• pH (1% aqueous solution) 8• Specific gravity 0,878
Recommended treatment	Add Defoamer directly to the system. Note: The amount and frequency of treatments required will depend on the severity of the foaming or the system. Avoid overtreating.
Package	DEFOAMER is packaged in 208L drums.
